Number of New Covid19 Cases by Date of Illness Onset:
Number of Covid19 Cases by Case Status and Date of Illness Onset:
Percentage of Covid19 Cases by Sex:
The percentage of reported cases is slightly higher among males (52%) compared to females (48%) in Holmes County. This pattern is similar to the state average.

**Percentage of Covid19 Cases by Age Group:**
Among Holmes County residents, the highest percentages of reported cases are among adults ages 30-49 and 60-69. The percentages of cases in these age groups are higher than the state average.

**Covid19 Cases by Zip Code:**
The highest number of reported cases reside in the 44654 zip code (133 cases) and residents of the 44681 zip code (39 cases) (map below). The highest case rates were found among residents of the 44633 (683 per 100,000), 44654 (632 per 100,000), and 44681 (481 per 100,000) zip codes (map not shown).

Number of Hospitalized Covid19 Cases Reported by Day:
The chart below excludes 3 hospitalizations with unknown admission date.

Covid19 Hospitalizations by Sex:
The percentage of hospitalized cases is higher among males (67%) than females (33%) in Holmes County residents. This pattern is consistent with the state average.

Covid19 Hospitalizations by Age Group:
Among Holmes County residents, the highest percentage of hospitalized cases have occurred among adults age 80+ (29%), 60-69 (29%) and 70-79 (24%). These age groups account for 82% of all hospitalizations combined which is higher than the state average of 60%.

Covid19 Hospitalizations by Zip Code:
12 out of the 21 hospitalized cases reside in the 44654 zip code. 4 hospitalized cases are from the 43804 zip code. The highest hospitalization rates were found in the 43804 (106 per 100,000) and 44654 (58 per 100,000) zip codes (map not shown).

**Data Sources:**

Updated: 7/12/2020
1. **Ohio Disease Reporting System (ODRS):** Information on cases of communicable diseases reportable under Ohio Revised Code are housed and maintained by the Ohio Disease Reporting System (ODRS). Corona Virus Disease 2019 (Covid19) is a reportable condition under Ohio Revised Code. Health Care Providers are required to immediately notify their local public health department of Covid19 cases for follow-up. Cases with a classification status of confirmed or probable are included in this report. Confirmed cases are defined as patients that receive a positive laboratory test performed for Covid19. Probable cases must meet clinical criteria and epidemiologic evidence without confirmatory laboratory testing OR meet presumptive laboratory evidence and either clinical criteria or epidemiologic evidence.

2. **Office of Vital Statistics:** The Holmes County General Health District Office of Vital Statistics receives reports on the causes of death that occur within the county. Covid19 deaths were included in this report if they were listed as the immediate or underlying cause of death on the death certificate.

3. **Definition of Recovered:** The number of cases minus the number of deaths minus the number of cases with illness onset in the last 21 days.
