

Weekly Covid-19 Summary

November 22-28, 2020

Summary:

Public health surveillance data indicate Corona Virus Disease 2019 (Covid19) activity in Holmes County increased at a slightly slower pace than the previous week. The cumulative number of cases reported to the Holmes County General Health District is 1,498 with 557 cases reported in the last 4 weeks. During the last 4 weeks, most of the cases are 50 years of age or older (60%) and case counts are slightly higher among females (56%). The cumulative number of hospitalized cases is 164 with 49 hospitalizations reported during the last 4 weeks. During the last 4 weeks, most of the hospitalized cases are male (63%) and 60 years of age or older (67%). Thirty-nine Holmes County residents have died from Covid19 with 5 deaths occurring in the last 4 weeks. All of the deaths in the last 4 weeks have been 70 years of age or older. 1,081 cases are presumed to be recovered.

Dashboard:

Indicator	Current Week	Previous Week	Trend (# of weeks)	Total to Date
Number of New Cases Reported ¹	115	126	 1	1,498
Number of Hospitalized Cases ¹	4	7	 4	164
Number of deaths: ²	0	3	 2	39
Number of Recovered Cases ³				1,199
Number of Active Cases				244

Number of New Covid19 Cases by Date Reported to the Health District:

The 7-day average for the number of new cases reported is 16.

Number of Covid19 Cases by Case Status and Date:

557 cases have been reported to the Holmes County General Health District in the last 4 weeks.

Percentage of Covid19 Cases by Sex:

During the last 4 weeks, the percentage of reported cases is slightly higher among females (56%) compared to males (44%). This pattern is consistent with the percentage of cases reported by sex since the beginning of the pandemic.

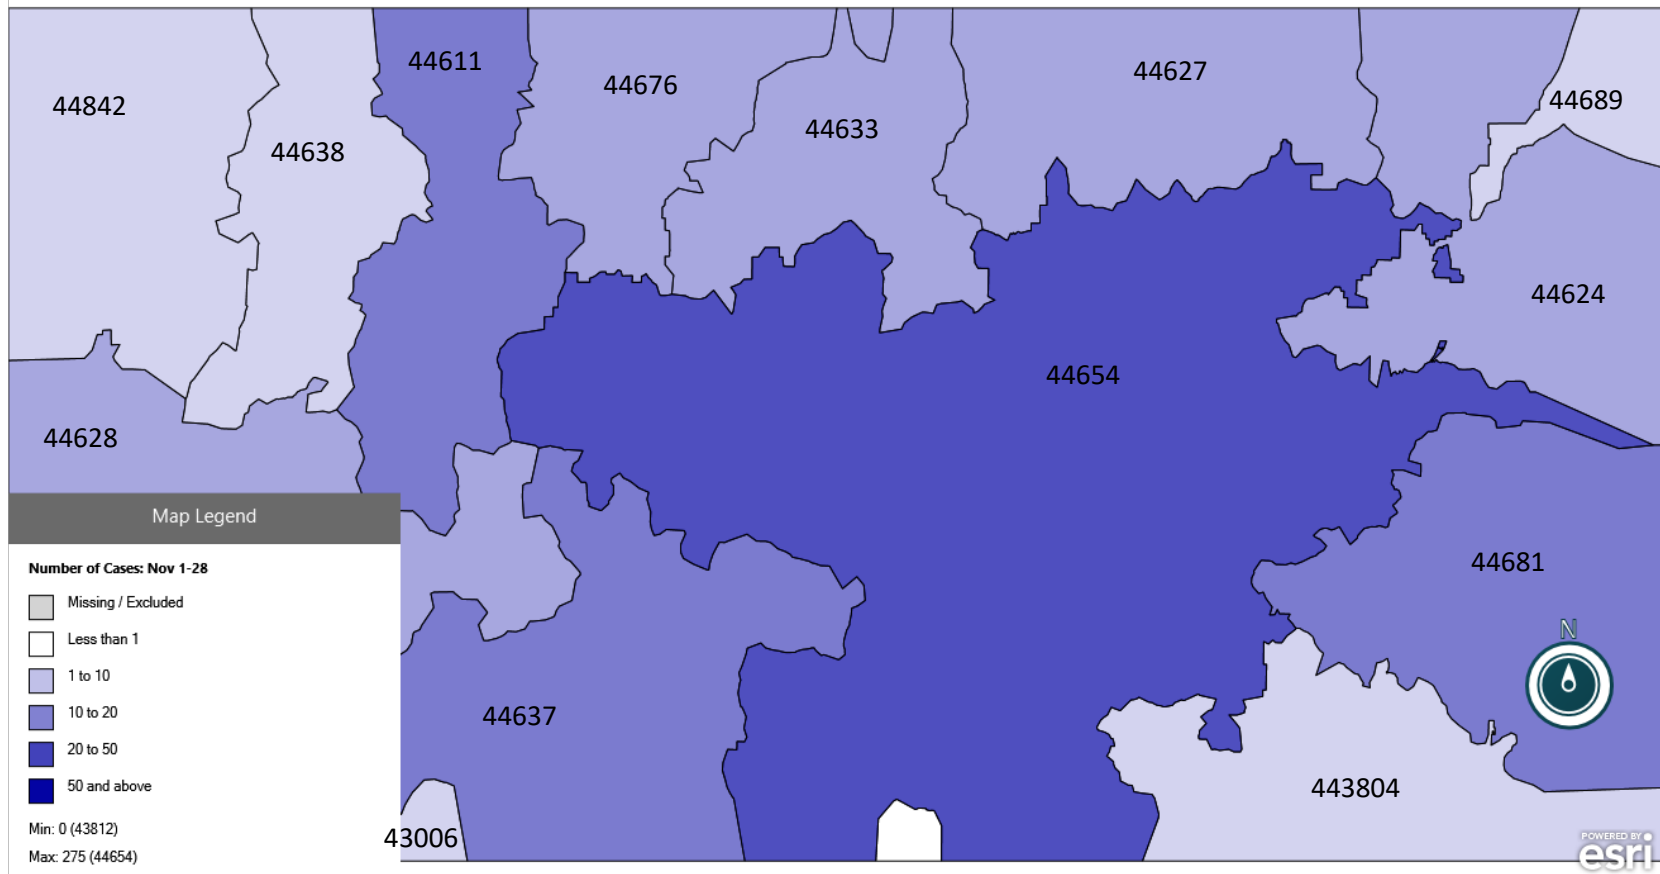

Percentage of Covid19 Cases by Age Group:

During the last 4 weeks, the highest percentages of reported cases were among individuals ages 50-59 (20%) and 60-69 (16%). This pattern is similar to the age distribution of cases since the beginning of the pandemic.

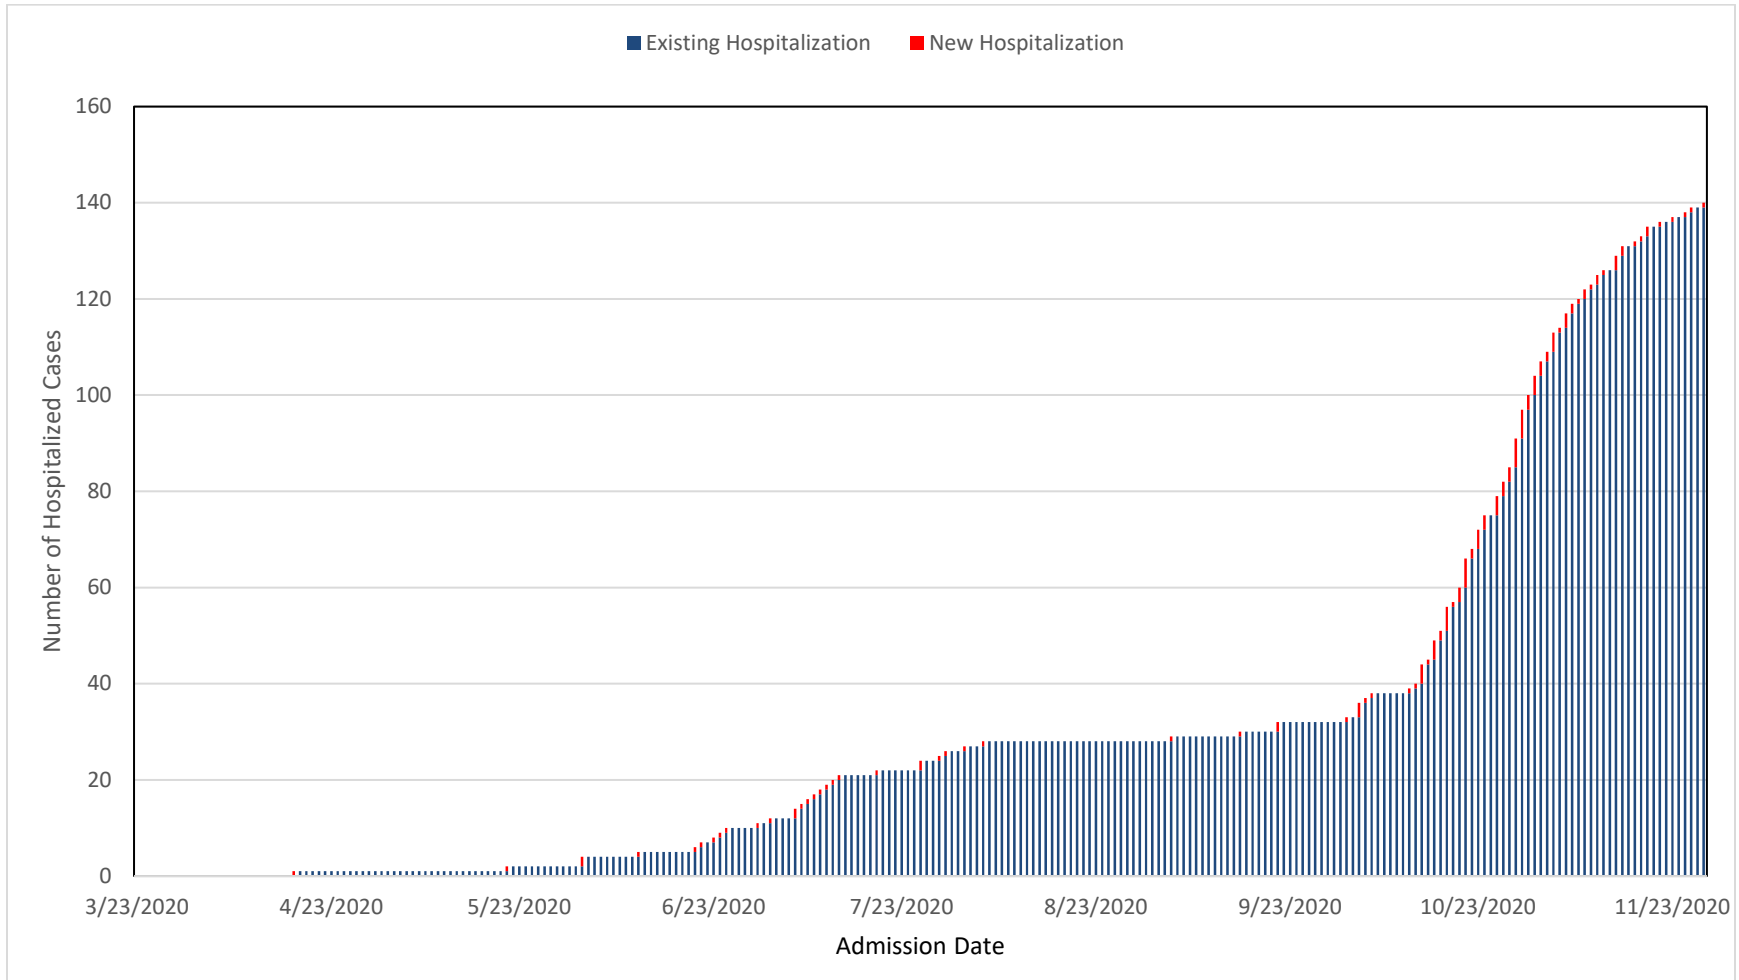

Covid19 Cases by Zip Code (Last 4 weeks):

During the last 4 weeks, the highest number of reported cases are residents of 44654 (275 cases), 44637 (44 cases), and 44687 (42 cases) (map below). The highest case rates were found in the 44687 (14,433 per 100,000), 44610 (13,084 per 100,000), 44690 (2,409 per 100,000), 44661 (2,339 per 100,000), and 44628 (2,039 per 100,000) zip codes (map not shown).

Number of Hospitalized Covid19 Cases Reported by Day:

49 hospitalizations have been admitted in the last 4 weeks. 8 out of the 49 have been admitted to an intensive care unit. The chart below excludes 25 hospitalizations with unknown admission date.

Covid19 Hospitalizations by Sex:

During the last 4 weeks, 63% of hospitalized cases were male and 37% were female. This pattern is consistent with the percentage of hospitalized cases by sex since the beginning of the pandemic.

Covid19 Hospitalizations by Age Group:

During the last 4 weeks, 67% of hospitalizations have occurred among those 60 or older. This pattern is slightly younger than the age distribution of hospitalizations since the beginning of the pandemic.

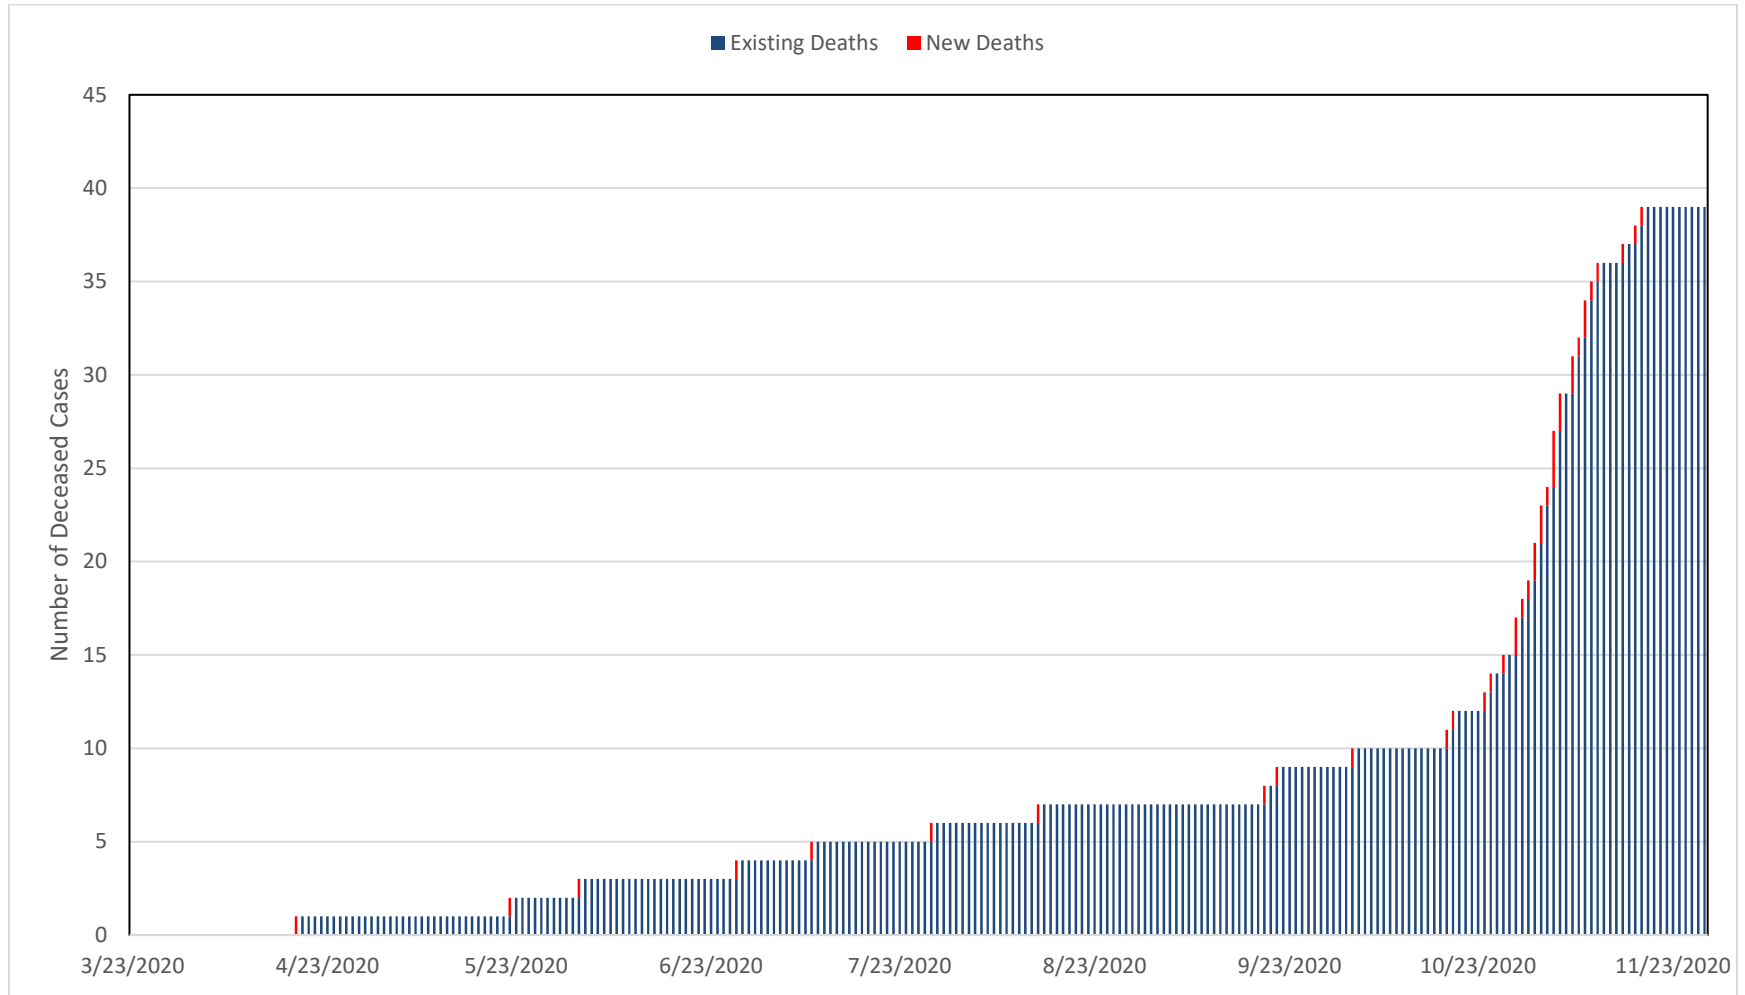

Covid19 Hospitalizations by Zip Code (Last 4 weeks):

During the last 4 weeks, 23 out of the 49 hospitalizations were residents of the 44654 zip code, 4 hospitalizations were from the 44687 zip code, and 4 hospitalizations were from the 44681 zip code each (map below). The highest hospitalization rates were found in the 44610 (1,869 per 100,000) and 44687 (1,375 per 100,000) zip codes (map not shown).

Covid19 Deaths by Date of Death:

5 deaths have been reported in the last 4 weeks.

Covid19 Deaths Reported by Sex:

During the last 4 weeks, the percentage of deaths were slightly higher among males (80%) compared to females (20%). The percentage of male decedents is higher than the cumulative percentage of male decedents since the beginning of the pandemic.

Covid19 Deaths Reported by Age:

During the last 4 weeks, all of the deaths occurred among cases age 70 or older. This pattern is older than the age distribution of deceased cases since the beginning of the pandemic.

Covid19 Deaths Reported by Zip Code (Cumulative):

Since the beginning of the pandemic, 15 residents from the 44687 zip code and 13 residents from the 44654 zip code have died. No other zip code has had more than 5 deaths (map below).

Data Sources:

1. **Ohio Disease Reporting System (ODRS):** Information on cases of communicable diseases reportable under Ohio Revised Code are housed and maintained by the Ohio Disease Reporting System (ODRS). Corona Virus Disease 2019 (Covid19) is a reportable condition under Ohio Revised Code. Health Care Providers are required to immediately notify their local public health department of Covid19 cases for follow-up. Cases with a classification status of confirmed or probable are included in this report. Confirmed cases are defined as patients that receive a positive laboratory test performed for Covid19. Probable cases must meet clinical criteria and epidemiologic evidence without confirmatory laboratory testing OR meet presumptive laboratory evidence and either clinical criteria or epidemiologic evidence.
2. **Office of Vital Statistics:** The Holmes County General Health District Office of Vital Statistics receives reports on the causes of death that occur within the county. Covid19 deaths were included in this report if they were listed as the immediate or underlying cause of death on the death certificate.
3. **Definition of Recovered:** The number of cases minus the number of deaths minus the number of cases with illness onset in the last 21 days.

Zip	Village	Population	New Cases (last 4 weeks)	Case Rate per 100,000	Hospitalizations (last 4 weeks)	Hospitalization Rate per 100,000	Cumulative Deaths	Death Rate per 100,000
